JD Wetherspoon, Union Rooms, Newcastle

J D Wetherspoon's Union Rooms is a Grade II Listed Building, located in Newcastle City Centre.

Before Works

After carrying out a detailed report together with a full photographic survey, Burnaby Stone Care were charged with carrying out the following restoration works:-

- ◆ Erection of a tube and clip scaffold access
- ◆ Cleaning to the sandstone fabric using the DOFF System
- ◆ Application of a suitable biocide to kill of any vegetation
- ◆ Replacement of 12 number balusters
- ◆ Replacement and carving to various sandstone features, including column capitals, string course, cills, heads, ashlar walling
- ◆ Re-pointing using a 1:3 lime mortar
- ◆ Various lime mortar repairs to old fixing holes
- ◆ Removal of loose and delaminated stonework back to a sound surface
- ◆ Replacement of code 5 lead.

During Works

Completed

Completed

The building remained open throughout the duration of the works.

Sunnybank Mills—1912 Mill, Farsley, Yorkshire

Initially built within this large mill complex, the Grade II Listed 1912 Mill was originally opened for use within the textile industry. Following the textile industry's decline the mill was then used as a production and filming studio by Yorkshire Television, with programmes such as Emmerdale Farm and Heartbeat using its facilities. Burnaby Stone Care were invited to help transform the mill into self-contained hi-spec office space and carried out the following works.

External

- ◆ Replacement of damaged stone units and cills
- ◆ Patch-pointing using a colour matched lime mortar
- ◆ Cleaning to all external fabric by means of a dilute chemical detergent in conjunction with the DOFF System
- ◆ Re-masticing all 187 windows
- ◆ Lime mortar restoration to numerous fixing holes

Internal

- ◆ Low-pressure abrasive cleaning to internal brickwork
- ◆ Abrasive cleaning/priming and an application of a one hour intumescent fireproof coating to cast iron columns and beams
- ◆ Re-pointing to brickwork
